**FOR IMMEDIATE RELEASE**

## **Maplesoft Group™ completes acquisition of Parameter Driven Solutions (PDS)**

---

**Ottawa, Canada - February 17th, 2010** - Maplesoft Group™ is pleased to announce that it has completed its acquisition of Parameter Driven Solutions (PDS). This news will bring many benefits for both Maplesoft and PDS customers as our primary goal remains customer satisfaction. We are dedicated to delivering superior support and can now deliver a concise approach to our customers on a national level with offices in Toronto, Ottawa, and Calgary.

With the rapid growth of Maplesoft's business in Ottawa and Calgary and the overwhelming response from customers valuing our Systems Integration offering, it was important for Maplesoft to seize this opportunity with PDS to further establish our presence both nationally and in Toronto. PDS has a long standing history in the Toronto market and has been providing technology solutions since 1983, serving a diverse customer base with a senior team of sales and technical professionals. We foresee a large opportunity with Maplesoft and PDS joining forces to deliver systems solutions to customers across new vertical markets including; Financial Services, Telecommunication, and Retail. With a common vision to leverage existing partnerships with Oracle, Sun Microsystems and Mitel, Maplesoft and PDS will continue to deliver the best in class Servers, Storage, Database, Middleware, Applications and Unified Communication solutions.

PDS has an outstanding reputation and their customers have responded with overwhelming support for the new integrated offering with Maplesoft. "Maplesoft will provide tremendous value to our existing customers," said Glenn Arnold, President of PDS. The PDS team will be integrated as part of the Technology division within Maplesoft. "We are eager to work with the PDS team to offer open standards-based technology solutions to our customers in Toronto," said Jody Campeau, President & CEO of Maplesoft. "By bundling new services from Maplesoft, customers can now purchase our fully integrated offerings including the project management, architecture, design, development and deployment services," commented Jack Gulas, Vice President of Technology for Maplesoft.

### **About Maplesoft Group**
